

**Clanio** is web hosted solution for Contact Relation Management (CRM).

Clanio stores and helps you remember your contact's important dates like - Birthday, Anniversary, and more specific dates as defined by user. Your contact can be social or professional. It sends reminder before each event.

Not only that, here is cool part. Clanio can also send email on your behalf, if configured to send emails. Thus you won't miss important dates of your loved ones! Clanio would make sure, you won't!

Keeping in touch has been never easier – thanks to **CLANIO**.

### Feature List – Clanio (Lite Version)

- Online access. NO installation, no upgrades. Access it anywhere.
- Users can define its contacts and important dates for contacts -- birthday and anniversary in initial version.
- Users can choose email templates for each of contact or write specific email and store it for each contact.
- Each Contact can be personalized in terms of subject, Greeting, Signature etc.
- Extra emails for to, cc and bcc can be provided for each contact.
- Member can import Yahoo address book (more to be added soon). That would give member quick start!
- Member can export address book in Clanio format. More formats to be added with future releases.
- Users can choose time zone for each contact, so that email would be delivered at their local time. ( It is defaulted to 9:00 am in morning )
- Email queue management. Member can view email queue and look at the actual email which would be sent out.
- CLANIO would send email to contact on specified date and time.

### Feature List – Clanio (Full Version)

- All features included in Clanio – Lite version.
- Users can define and manage their own templates. This feature would give complete freedom to members about what to write their contacts.
- Member can define their own events too. Not just restricted to Birthday and Anniversary.
- For complete version, unlimited Events and Email Templates.
- Member can set reminders for the events.
- More control on email queue. Members can change outgoing email without editing the contact. Just that instance of email would be changed. For such customization features.
- Clanio desktop client is also available to view/manage all information to easy-to-use desktop version. It syncs with user's online account.
- Microsoft Outlook integration connector to be released on version 2.0
